### Requested Design Data

**State of aggregation**       liquid                       gaseous                       vaporous

**Medium**                      name: \_\_\_\_\_                      formula: \_\_\_\_\_  
    concentration: \_\_\_\_\_

**Rated pressure**                      \_\_\_\_\_ bar

**Operating pressure**                      \_\_\_\_\_ bar                       absolute atmosphere                       above atmospheric

**Rated temperature**                      \_\_\_\_\_ [ \_\_\_\_\_ ] unit

**Operating temperature**                      \_\_\_\_\_ [ \_\_\_\_\_ ] unit

**Density**                      \_\_\_\_\_ [ \_\_\_\_\_ ] unit

**Viscosity**                      \_\_\_\_\_ cSt.                      at \_\_\_\_\_ °C

**Flow rate**                      \_\_\_\_\_ [ \_\_\_\_\_ ] unit

**Required filter finess**                      \_\_\_\_\_ µm                      or                      mesh: \_\_\_\_\_

**Specification of the dirt level**  
 \_\_\_\_\_

**Type of Filters**

Temporary strainer  
 Witch Hat                       Top Hat                       Flat Disc

Mono strainer  
 T-Type                       Y-Type                       Mono In-Line

Duplex-Strainer / Fully Automated Systems  
 Firplex                       self cleaning system

**Material of the housing**                      \_\_\_\_\_

**Material of the filter element**                      \_\_\_\_\_

**Connection**                       socket weld                       screwed gland [G] \_\_\_\_\_  
     flange [DIN]                       flange [ANSI]                      DN \_\_\_\_\_

**Quantity strainer**                      \_\_\_\_\_ piece

**Certificate / inspection**  
 \_\_\_\_\_

**Notes / supplies / specification / documentation / painting / others**
